Instructor Comments

Describe the one best thing about the lab section or the instructor that was effective in helping you learn. If you could suggest one thing to improve the section, what would it be?

- He answered emails almost immediately with thorough explanations and always offered to help troubleshoot. Very helpful instructor
- He explained any questions we had from class in thorough detail and made sure we understood it. Although he set up a loose "guide" for what to focus on in the recitation, he also made sure to focus on concepts that we did not fully understand. I wouldn't change anything about this course.
- Best: very helpful material and clear illustration
To improve: discuss some homework problems
- The instructor was very dedicated, even uploading code blocks with notes online to help us learn to use R-Studio for our assignments.
- I appreciated the slideshows he prepared for recitation. Also, he was very approachable, and his recitation sessions were helpful, informative, and a good complement to lectures.
- Giovanni is very considerate and kind to students. He is very accessible to students, and he is always happy to spend time discussing questions. However, if he could explain more questions similar to what we have on problem sets, that would be very helpful.
- The instructor clarified any difficult material learned in the lectures and went through a good amount of other examples and applications in class.
- This TA went above and beyond to accommodate the students. This TA made the labs feel like lectures by creating slides on covered topics as well as going over problems students had. Giovanni is very detailed and efficient in the work that he does.
- One good thing about the lab was that the notes it provided were very helpful in applying them to problems since the lecture didn't go into as much depth on the specific behaviors of the theory. I don't really have any suggestions for the lab, it served perfectly as a supplement to the lecture.
